

Cybersecurity Training

Let's Bring Cybersecurity Training to your LBS Program

Hi,
I'm offering free cybersecurity training sessions designed specifically for LBS programs like yours.

The sessions are practical, accessible, and flexible. Whether you have staff, tutors, or volunteers joining from home or gathered in a shared space, we'll make it work.

Here's How to Get Started:

Step 1: Book a short planning call (recommended)

Let's connect for a quick conversation about your program's needs, preferred timing, and logistics.

👉 Use this link to book your planning meeting: [Schedule Planning Meeting](#).

Step 2: Complete the intake form (after the planning meeting)

This short form helps me tailor the sessions to your context. It asks about your team's cybersecurity habits, any past training, and how your staff will join the session (individually, together in one room, etc.).

👉 Intake form link: [Intake Form](#)

Please complete this after we've had a chance to meet.

Step 3: Book your training session(s)

Once you've submitted the form, you can use the separate calendar link to book one or both sessions at times that work for your team.

👉 Use this separate link to book your training sessions: [Schedule Cybersecurity Training](#).

Step 4: Attend the sessions on Zoom

Each session is 45 minutes long and delivered live. Everyone will receive the slides, useful links, and handouts they can keep and use.

Step 5: Share your feedback

After the session(s), I'll send a short follow-up form — just a few questions to help me improve future sessions and support your program better.

If you have any questions — or if you want to explore other ways AlphaPlus can support your team — just get in touch. I'm here to help. Looking forward to working together,

Alan
