

How to write prompts for ChatBots and Generative AI

- Compiled by [Tracey Mollins](#) at [AlphaPlus](#)

[Open Prompt Book from CampGPT](#) at the Ed Tech Centre @ World Education: a resource for and by adult educators about how they use AI mostly as a brainstorming tool. As they report, "Over and over again in CampGPT, educators describe the use of chatbots as a great "starting point." In fact, some find that using these tools is most effective for generating ideas rather than ready-to-use materials." Here is a description of the Open Prompt Book: "In CampGPT, educators experimented with generative AI-enabled tools like chatbots and image generators to learn and explore together. Their work and insights have been compiled in the Open Prompt Book from CampGPT. Throughout this prompt book, you'll learn more about generative AI, what educators use it for, and key tips and tricks."

The **RACEF** (Role, Action, Context, Examples, Format) framework is explained in the Neuron's
