[Open Prompt Book from CampGPT](#) at the Ed Tech Centre @ World Education

A resource for and by adult educators about how they use AI mostly as a brainstorming tool. As they report, “Over and over again in CampGPT, educators describe the use of chatbots as a great “starting point.” In fact, some find that using these tools is most effective for generating ideas rather than ready-to-use materials.” Here is a description of the Open Prompt Book: "In CampGPT, educators experimented with generative AI-enabled tools like chatbots and image generators to learn and explore together. Their work and insights have been compiled in the Open Prompt Book from CampGPT. Throughout this prompt book, you'll learn more about generative AI, what educators use it for, and key tips and tricks."

[AI for Learning and Work](#) from the Ed Tech Centre @ World Education

You can find the recordings of the four Generative AI EdTech Bytes that cover the applications and implications of generative AI for education ([YouTube Playlist](#)) plus a series of blog posts about the use of ChatGPT and AI in education.

[ChatGPT: Leveraging AI to Support Personalized Teaching and Learning](#) in the [June 2023 Adult Literacy Education Journal](#) by Sarah Cacicio and Rachel Riggs: a resource for teachers/instructors with ideas for how to use ChatGPT for learning in an adult literacy setting.

[AI Writing Tools](#) by Erin Stapleton-Corcoran, CATE Instructional Designer and Patrick Horton, CATE Instructional Designer (2023)

"How to Approach AI Writing Tools in Your Classroom

While there is no universal approach to utilizing AI writing tools in your classroom, you should take into account different factors, including your course's learning objectives, relevant disciplinary skills, and your level of comfort with the technology. As you create your unique AI usage guidelines, here are steps to help build your AI working policy."
